

If you registered in time to have a kit prepared for each of the children you registered, you do not need this page.

However, if you did not receive a kit you will want to print out the two handouts used for this craft (see pages 2 & 3 below) and gather together the supplies listed for those who did not receive a kit, See what supplies are needed at the supplies link.

**HINT:** This craft will work far better if you either print these on card stock, or glue them onto cardstock or construction paper after printing on regular printer paper. This will give the paper the strength it needs to perform well for the child.
